Preface

The Theoretical Division is an intellectual resource to Los Alamos National Laboratory and the nation, providing creative scientific and technological solutions to challenges in national security and related problems of national and global importance. The Laboratory's national security mission has an enduring need for science and technology beyond today's frontiers. Theoretical Division responds to this need by striving to provide the best science and scientists to current LANL missions, and by pursuing frontier science to ensure excellence in scientific capabilities, creating new scientific directions, and attracting scientific leaders to LANL.

The Theoretical Division's capabilities are central to the Laboratory's Strategic Goals. Working with teams across the Laboratory, we undertake the major multidisciplinary challenge of integrating theory, modeling, simulation, and visualization with experimental and other data to provide cutting-edge, validated tools to interpret and guide experiments and expand predictive capability and uncertainty quantification to complex phenomena and systems. The core Nuclear Weapons Program—the centerpiece of the DOE Weapons Complex—depends critically on the viability of our approach. However, virtually every major initiative at LANL also relies heavily on this integrated capability: threat reduction and homeland security, manufacturing science, biology, nanoscience, quantum information, energy, infrastructure, and so on.

Each year, T-Division staff selects a collection of brief topical reports on their progress, as part of our self-assessment process. This collection is not intended to be complete. Rather it aims to demonstrate, through timely examples, the energy and progress across (and between) many disciplines in the Division in pursuit of our goal to serve the Laboratory and nation by furthering our fundamental understanding of, and predictive capabilities for, complex phenomena.

CONTENTS

Preface

Alan Bishop and Paul Dotson (T-DO)

Part 1: Featured Groups T-1, T-3, T-11, T-12, T-14

T-1

EQUATION OF STATE AND MECHANICS OF MATERIALS

Equation of State Developments in T-1.....	5
<i>Nicolas Bock, Leonid Burakovskiy, Eric Chisom, Scott Crockett, Giulia De Lorenzi-Venneri, Denise George, Carl Greeff, J. D. Johnson, Travis Peery, Sven Rudin, and Duane Wallace, T-1</i>	
Multiphase Equations of State for the SESAME Database	7
<i>Eric D. Chisom, Denise C. George, and Carl W. Greeff, T-1</i>	
Dynamic Response of HMX Through the β-δ Phase Transition	9
<i>Bradford E. Clements, Eric M. Mas, JeeYeon N. Plohr, Axinte Ionita, T-1; and Francis L. Addessio, T-3</i>	
Micromechanics Models for Plastic-Bonded High Explosives:	
Recent Developments	11
<i>Bradford E. Clements and Eric M. Mas, T-1; and Curt A. Bronkhorst and Todd O. Williams, T-3</i>	
Low-Pressure Equation of State of Polymers	13
<i>Bradford E. Clements, T-1</i>	
Image Shape Analysis.....	15
<i>Denise George, T-1</i>	
Continuum Models for Multiphase EOS	17
<i>Carl W. Greeff, T-1</i>	
Are Lattice Relaxations in Thin Film Nanodevices Driven by Quantum-Size or Interface Proximity Effects?	19
<i>Erik Holmström, Nicolas Bock, John Wills, and Anders M. N. Niklasson, T-1</i>	

Two-Scale FEM Approach in the Dynamic Response of a Heterogeneous Material	21
<i>Axinte Ionita, Eric M. Mas, and Bradford E. Clements, T-1</i>	

First Principles Calculations of the 3-k Magnetic Structure and 3-k Distortion in UO₂.....	23
<i>Raquel Lizárraga, T-1; Massimiliano Colarieti-Tosti, IFM, Sweden; Olle Eriksson and Lars Nordström, Uppsala University, Sweden; and John M. Wills, T-1</i>	

Studies of the Incommensurate Magnetic Structure of a Heavy Fermion System: CeRhIn₅	25
<i>Raquel Lizárraga, T-1; Massimiliano Colarieti-Tosti, IFM, Sweden; Olle Eriksson and Lars Nordström, Uppsala University, Sweden; and John M. Wills, T-1</i>	

Finite Element Method Calculations on Statistically Consistent Microstructures of PBX 9501.....	27
<i>Eric M. Mas, Bradford E. Clements, and Axinte Ionita, T-1; and Paul D. Peterson, DX-2</i>	

Dynamically Driven Phase Transformations in Damaged Composite Materials....	29
<i>JeeYeon N. Plohr and Bradford E. Clements, T-1; and Francis L. Addessio, T-3</i>	

Calculated Effects of Ga on the Pu Lattice after the δ to α Transformation	31
<i>Sven P. Rudin and John M. Wills, T-1</i>	

Phonons from Density Functional Theory for Equations of State.....	33
<i>Sven P. Rudin, J. D. Johnson, and John M. Wills, T-1</i>	

Vibration-Transit Theory for Time Correlation Functions in Liquids: A Model for Transits.....	35
<i>Giulia De Lorenzi-Venneri and Duane Wallace, T-1</i>	

T-3 **FLUID DYNAMICS**

Local Deformation Behavior of Metallic Polycrystals.....	39
<i>Curt A. Bronkhorst and B. L. Hansen, T-3</i>	

A Strength Model for Materials with Phase Transformations.....	41
<i>Eric N. Harstad, Francis L. Addessio, and Q. Ken Zuo, T-3; and Carl W. Greeff, T-1</i>	

Permeating Fluid Effects in Cellular Material Systems under Dynamic Loading....	43
<i>Mark W. Schraad and Francis H. Harlow, T-3</i>	

Instabilities in Cellular Solids and the Role of Dispersity in Geometric Structure.....	45
<i>Mark W. Schraad, T-3</i>	

Stochastic Multiscale Material Modeling	47
<i>Todd O. Williams, T-3</i>	
Properties of Metals at Extreme Loading Rates	49
<i>Aleksander Zubelewicz, T-3</i>	
A Two-Component Element for Modeling Strain Localization in Materials.....	51
<i>Q. Ken Zuo and Paul J. Maudlin, T-3</i>	
A Rate-Dependent Damage Model for Brittle Materials under Dynamic Loading..	53
<i>Q. Ken Zuo and Francis L. Addessio, T-3; and John K. Dienes, T-14</i>	
An Implicit Algorithm for a Rate-Dependent Brittle Damage Model	55
<i>Q. Ken Zuo, T-3</i>	

T-11

CONDENSED MATTER AND STATISTICAL PHYSICS

Fourier Transform Inelastic Electron Tunneling Spectroscopy and STM	59
<i>Alexander V. Balatsky and Jian-Xin Zhu, T-11</i>	
Oscillating Elastic Defects: Competition and Frustration	61
<i>Julien Barré, T-11/CNLS; Alan R. Bishop, T-DO; Turab Lookman and Avadh Saxena, T-11</i>	
Coexistence of Ferroelectricity and Ferromagnetism.....	63
<i>Cristian D. Batista and James E. Gubernatis, T-11; and Wei-Guo Yin, Brookhaven National Laboratory</i>	
Universal Properties of Modulated Antiferromagnetic Systems	65
<i>Cristian D. Batista, Gerardo Ortiz, and Alexander V. Balatsky, T-11</i>	
Strong Electron-Phonon Coupling in δ-phase Stabilized Plutonium	67
<i>Matthias J. Graf and Turab Lookman, T-11; John M. Wills and Duane C. Wallace, T-1; and Jason C. Lashley, MST-NHMFL</i>	
The Quantum Dynamics of Polaron Formation.....	69
<i>Li-Chung Ku, University of Texas; and Stuart Trugman, T-11</i>	
Defect Induced Nucleation in Cubic to Tetragonal Martensites	71
<i>Turab Lookman and Avadh Saxena, T-11; and Rajeev Ahluwalia, Institute for Materials Research & Engineering, Singapore</i>	
Molecular Bridging in Asymmetric Triblock Copolymers	73
<i>Kim Ø. Rasmussen, T-11; Edward M. Kober, T-14; and R.J. Spontak, North Carolina State University</i>	

Theory of Forced DNA Unzipping.....75

Kim Ø. Rasmussen, T-11; Nikolaos Voulgarakis, CNLS; and Alan R. Bishop, T-DO

Piezoelectric Response of Domains in Ferroelectrics77

Avadh Saxena and Turab Lookman, T-11; and Rajeev Ahluwalia, Institute for Materials Research & Engineering, Singapore; and W. Cao, Pennsylvania State University

Electron Spin Flow and Transport in Semiconductor Epilayers.....79

Darryl L. Smith, T-11; M. Hruška, Lawrence Livermore National Laboratory; Š. Kos, Cambridge University; Avadh Saxena, T-11; and S.A. Crooker, MST-NHMFL

Phase Diagram and Spectroscopy of Fulde-Ferrell-Larkin-Ovchinnikov States of Two-Dimensional d-wave Superconductors81

Anton B. Vorontsov, Louisiana State University; James A. Sauls, Northwestern University; and Matthias J. Graf, T-11

Single Molecule DNA Sequencing with Inelastic Tunneling Spectroscopy STM ...83

Jian-Xin Zhu, Kim Ø. Rasmussen, and Stuart A. Trugman, T-11; Alan R. Bishop, T-DO; and Alexander V. Balatsky, T-11

T-12

THEORETICAL CHEMISTRY AND MOLECULAR PHYSICS

Increasing the Length Scale in Temperature Accelerated Dynamics Simulations ...87

Jacques Amar and Yunsic Shim, University of Toledo; Blas Uberuaga, MST-8; and Arthur F. Voter, T-12

Role of Fluctuations in a Snug-fit Mechanism of KcsA Channel Selectivity.....89

D. Asthagiri and Lawrence R. Pratt, T-12; and Michael E. Paulaitis, Ohio State University

Structure and Electronic Excitations in Organometallic Transition

Metal Complexes.....91

Enrique R. Batista and Richard L. Martin, T-12

A Mechanism for the Mullins Effect.....93

David E. Hanson, T-12; and Marilyn Hawley and Robert Houlton, MST-8

Electronic Interactions in Organometallic Actinide Complexes95

P. Jeffrey Hay, Richard L. Martin, Enrique R. Batista, T-12; and Aurora E. Clark, Washington State University

Simulating the Structure and Properties of Magnesium Methoxide.....97

Neil J. Henson, T-12; and Kevin C. Ott, C-SIC

Update on the Aging of PBX 9501 via Free-Radical Oxidation	99
<i>Joel D. Kress, T-12</i>	
Avalanches and Scaling in Plastic Deformation.....	101
<i>Richard LeSar, T-12; Marisol Koslowski, Purdue University; and Robb Thomson, T-12</i>	
Investigations of Hybrid Density Functional Theory in Condensed Matter.....	103
<i>Richard L. Martin, Cristian V. Diaconu, Enrique R. Batista, and P. Jeffrey Hay, T-12</i>	
Photoexcited Vibrational Dynamics in Vicinity of Conical Intersections	105
<i>Andrei Piryatinski and Sergei Tretiak, T-12; Misha Stepanov, T-13; and Vladimir Chernyak, Wayne State University</i>	
Noise at the Crossover from Wigner Liquid to Wigner Glass.....	107
<i>Charles Reichhardt, T-13; and Cynthia J. Olson Reichhardt, T-12</i>	
Do Vortices Entangle?	109
<i>Cynthia J. Olson Reichhardt, T-12, and Matthew B. Hastings, T-13</i>	
Coulomb Explosion Mechanisms for Ion Damage	111
<i>Cynthia J. Olson Reichhardt, T-12</i>	
Time-Dependent Density Functional Theory for Frequency-Dependent Nonlinear Optical Response	113
<i>Sergei Tretiak, T-12</i>	
Real Time Observation of Nonlinear Coherent Phonon Dynamics in Single-Wall Carbon Nanotubes	115
<i>Sergei Tretiak and Andrei Piryatinski, T-12; CNLS; Avadh Saxena, T-11; Richard L. Martin, T-12; Alan R. Bishop, T-DO; A. Gambetta, C. Manzoni, E. Menna, M. Meneghetti, G. Cerullo, and G. Lanzani, Politecnico di Milano</i>	

T-14 **EXPLOSIVES AND ORGANIC MATERIALS**

The Rayleigh-Taylor Instability via Direct Simulation Monte Carlo.....	119
<i>John L. Barber and Kai Kadau, T-14; Timothy C. Germann, X-1; Peter S. Lomdahl, T-14; Brad L. Holian, X-1; and Berni Alder, Lawrence Livermore National Laboratory</i>	
Coupling Grain Scale and Bulk Mechanical Response of PBXs via Numerical Simulation.....	121
<i>Scott Bardenhagen and Andrew Brydon, T-14</i>	
Simulation and Analysis of Real Foam Microstructures	123
<i>Scott Bardenhagen, Andrew Brydon, and Lucas Wharton, T-14</i>	
Influence of Supercoiling on the Disruption of dsDNA.....	125
<i>Shirish M. Chitanvis and Paul Welch, T-14</i>	

Can Low-Power Electromagnetic Radiation Disrupt Hydrogen Bonds in dsDNA?.....	127
<i>Shirish M. Chitanvis, T-14</i>	
Probing the Physics of Mix	129
<i>Shirish M. Chitanvis, T-14</i>	
Atomistic Studies of Quasi-Static Compression in α-HMX.....	131
<i>Eugenio Jaramillo and Thomas D. Sewell, T-14; and Alejandro Strachan, Purdue University</i>	
Inelastic Deformation in Shock Loaded HMX.....	133
<i>Eugenio Jaramillo and Thomas D. Sewell, T-14; and Alejandro Strachan, Purdue University</i>	
Direct Observation of the alpha-epsilon Transition in Shock-Compressed Iron via Nanosecond X-ray Diffraction.....	135
<i>Kai Kadau, T-14; Timothy C. Germann, X-1; Peter S. Lomdahl, T-14; Brad L. Holian, X-1; D.H. Kalantar and J. Hawrelak, Lawrence Livermore National Laboratory; and K. Rosolankova and J.S. Wark, University of Oxford</i>	
Multibillion-atom Molecular Dynamics Simulations of Shockwave Phenomena on BlueGene/L.....	137
<i>Timothy C. Germann and Brad L. Holian, X-1; and Kai Kadau and Peter S. Lomdahl, T-14</i>	
Modeling Strategies for Containing Pandemic Influenza in the U.S.....	139
<i>Kai Kadau, T-14; Timothy C. Germann, X-1; Peter S. Lomdahl, T-14; Norman L. Johnson, CHS; Tim McPherson, D-4; Ira M. Longini, Jr., Emory University; and Catherine A. Macken, T-10</i>	
Detonation Wave Profile in PBX 9501	141
<i>Ralph Menikoff, T-14</i>	
The Effects of Crowding in Dendronized Polymers.....	143
<i>Paul M. Welch, T-14; and Cynthia F. Welch, LANSCE-12</i>	
Parameterizing Dynamic Field Simulations from Image Analysis	145
<i>Paul M. Welch and Thomas D. Sewell, T-14; Kim Ø. Rasmussen, T-11; Shirish M. Chitanvis, T-14; and Turab Lookman, T-11</i>	
A Tunable Dendritic Molecular Actuator.....	147
<i>Paul M. Welch, T-14</i>	
Atomistic Simulations of Chemical Reaction in Nanolaminates under Shock Loading	149
<i>Shijin Zhao, T-14; Timothy C. Germann, X-1; and Alejandro Strachan, Purdue University</i>	

Part 2:
Other T-Division Groups
**T-3 Nonmaterials, T-4, T-6 T-7, T-8, T-10, T-13,
T-15, T-16, T-QC**

T-3
FLUID DYNAMICS (NONMATERIALS)

Multiphysics Time Integration and Long Time Integration Error	155
<i>Dana A. Knoll, Vincent A. Mousseau, Rick M. Rauenzahn, Katherine J. Evans, T-3; and Luis Chacón, T-15</i>	
Nuclear Reactor Safety.....	157
<i>Vincent A. Mousseau, T-3</i>	
Multiphase Flow Approach Toward Fluid-Structure Interactions.....	159
<i>Xia Ma, Qisu Zou, Duan Z. Zhang, and W. Brian VanderHeyden, T-3; and Nely Padial-Collins, CCS-2</i>	
Acoustic Wave Propagation in a Particle-Laden Gas	161
<i>Peter J. O'Rourke, Michael C. Cline, and Manjit S. Sahota, T-3</i>	
KIVA-4: An Unstructured Version of KIVA-3V	163
<i>David J. Torres, T-3</i>	
Coupled Chemical Climate Modeling.....	165
<i>Mathew E. Maltrud, T-3; Scott Elliott, CCS-2; Shaoping Chu, EES-2; P. Jones, T-3; and J. Drake, Oak Ridge National Laboratory</i>	
Temporal Accuracy of the Solution of Radiation Hydrodynamics Equations.....	167
<i>Rick M. Rauenzahn, Vincent A. Mousseau, and Dana A. Knoll, T-3</i>	

T-4
ATOMIC AND OPTICAL THEORY

Small Polarons in a Dilute Bose-Einstein Condensate.....	171
<i>Fernando M. Cucchietti and Eddy Timmermans, T-4</i>	
Spectroscopic Characterization of an Ultrashort Laser Driven Ar Cluster Target ..	173
<i>Manolo Sherrill, Joseph Abdallah, Jr., George Csanak, T-4; Evan Dodd, X-1; Yuji Fukuda,</i>	

JAERI, Kyoto, Japan; and Anatoly Faenov, VNIIFTRI Moscow, Russia

Ab-initio Simulations of the Nonequilibrium Properties of Warm Dense Gold....175
*Stephane Mazevert, T-4; and J. Clérouin, P.M. Anglade, V. Recoules, and G. Zerah, CEA/DAM
Île-de-France*

Improvements to the Finite-Temperature Average-Atom Model177
James Colgan, George Csanak, and Lee A. Collins, T-4; Christopher J. Fontes, X-1

Triple Photoionization of Li and Be179
James Colgan, T-4

***Mean-Field Statistical Theory of Finite Quantum Systems with Applications to
Hot Dense Plasmas181***
Sergey A. Ponomarenko, George Csanak, David P. Kilcrease, and Manolo Sherrill, T-4

T-6 THEORETICAL ASTROPHYSICS

Oscillating Burning on Accreting Neutron Stars.....186
*Alexander Heger, T-6; Andrew Cumming, McGill University; and Stan Woosley, University of
California, Santa Cruz*

Hydrodynamic Simulations of He-shell Flash Convection.....187
*Falk Herwig, T-6; Bernd Freytag, T-6/Michigan State University/Uppsala University; Robert
M. Hueckstaedt and Francis X. Timmes, X-2*

T-7 MATHEMATICAL MODELING AND ANALYSIS

***A Family of Mimetic Finite Difference Methods on Polygonal and
Polyhedral Meshes.....191***
Franco Brezzi, Konstantin Lipnikov, and Valeria Simoncini, T-7

New Discretization Methodology on Generalized Polyhedral Meshes193
Franco Brezzi, Konstantin Lipnikov, and Mikhail Shashkov, T-7

Interface Reconstruction in Multifluid Flow Simulations.....195
Rao Garimella, Vadim Dyadechko, Blair Swartz, and Mikhail Shashkov, T-7

***Bloch-Front Turbulence in a Periodically Forced
Belousov-Zhabotinsky Reaction197***
Aric Hagberg, T-7

Rare Events in Turbulence Might Not Be So Rare.....199
Susan Kurien, T-7

Differential Equations in Random Domains	201
<i>Daniel M. Tartakovsky, T-7; and Dongbin Xiu, Purdue University</i>	

T-8

ELEMENTARY PARTICLES AND FIELD THEORY

Inverse-Scattering Theory and the Density Perturbations from Inflation	205
<i>Salman Habib, T-8; Katrin Heitmann, ISR-1; and Gerard Jungman, T-6</i>	

T-10

THEORETICAL BIOLOGY AND BIOPHYSICS

Conformational Dependence of Enzyme Function.....	209
<i>Montiago X. LaBute, Paul W. Fenimore, Chang-Shung Tung, Benjamin H. McMahon, T-10</i>	

Nanocomputers Inside Our Bodies: Understanding How the Ribosome Decodes Genetic Information	211
<i>Kevin Y. Sanbonmatsu, T-10</i>	

T-13

COMPLEX SYSTEMS

Application of Optically Detected Magnetic Resonance in a Nanoprobe to Measure- ment of Single Electron and Nuclear Spin States.....	215
<i>Gennady P. Berman, T-13; Alan R. Bishop, T-DO; Boris M. Chernobrod, T-13; Marilyn E. Hawley and Geoffrey W. Brown, MST-8; and Vladimir I. Tsifrinovich, Polytechnic University</i>	

Collective Decoherence of the Superpositional Entangled States in Quantum Shor Algorithm.....	217
<i>Gennady P. Berman and Dmitry I. Kamenev, T-13; and Vladimir I. Tsifrinovich, Polytechnic University</i>	

Iterative Algorithm for Finding Frequent Patterns in Transactional Databases	219
<i>Gennady P. Berman, Vyacheslav N. Gorshkov, Edward P. MacKerrow, T-13; and Xidi Wang, Citigroup, Sao Paulo, Brazil</i>	

Novel Opto-Nanomechanical Photodetector for Improving the Sensitivity of LIDAR and Local Optical Sensors.....	221
<i>Gennady P. Berman, T-13; Alan R. Bishop, T-DO; Boris M. Chernobrod, T-13; and Marilyn E. Hawley and Geoffrey W. Brown, MST-8</i>	

Quasiclassical Model of Spin Diffusion and Relaxation in a Nonuniform

Magnetic Field	223
<i>Gennady P. Berman, Boris Chernobrod, Vyacheslav N. Gorshkov, T-13; and Vladimir I. Tsifrinovich, Polytechnic University</i>	

Sub Shot-Noise Phase Sensitivity with a Bose-Einstein Condensate Mach-Zehnder Interferometer.....	225
<i>Gennady P. Berman, T-13; Alan R. Bishop, T-DO; Lee A. Collins, T-4; and Luca Pezzé and Augusto Smerzi, T-13</i>	

T-15 PLASMA THEORY

A Nonlinear, Fully Coupled Moving Mesh Adaptive Grid Strategy	229
<i>Luis Chacón and Giovanni Lapenta, T-15</i>	

Single Helicity States in Reversed Field Pinches.....	231
<i>Gian Luca Delzanno, Luis Chacón, and John M. Finn, T-15</i>	

Kink Stability with Line Tying	233
<i>Evstati G. Evstatiev, Gian Luca Delzanno, and John M. Finn, T-15</i>	

Regression in the Presence of Strongly Correlated Data	235
<i>Christopher S. Jones and John M. Finn, T-15; and Nicolas Hengartner, D-1</i>	

NUTHELLA: A Simulation Tool for Generation IV Nuclear Reactors.....	237
<i>Giovanni Lapenta, T-15</i>	

Electrostatic Fields Mediate Micro/Macro Coupling in Plasmas	239
<i>Giovanni Lapenta, T-15; William Daughton, X-1; Thomas Intrator, P-24; and Benoit Lavraud, ISR-1</i>	

Virtual Nanoscience Laboratory: A Tool for the Mesoscale Simulation of Nanomaterials	241
<i>Giovanni Lapenta and Gianluca Zuccaro, T-15</i>	

PARSEK: A New Integrated Package for Plasma Simulation Based on Particles ...	243
<i>Giovanni Lapenta and Stephano Markidis, T-15</i>	

T-16 NUCLEAR PHYSICS

Symmetry of the Relativistic Quantum Mechanical Harmonic Oscillator and the Antinucleon Spectrum in Nuclei	247
<i>Joseph N. Ginocchio, T-16</i>	

Calculation of Neutron Spectra in beta-delayed Neutron-Emission	249
<i>Toshihiko Kawano, Peter Möller, and William B. Wilson, T-16</i>	

Determination of Am Fission Barriers from Calculated High-Dimensional Potential-Energy Surfaces	251
<i>Peter Möller, T-16</i>	

The Reactions $^{13}C(p,\gamma)$ ^{14}N and $^{10}B(p,\alpha)$ ^{7}Be	253
<i>Philip R. Page and Gerald M. Hale, T-16</i>	

T-QC QUANTUM COMPUTING

Sub-Planck Structures in Phase Space and Heisenberg-Limited Measurements ...	257
<i>Diego A. R. Dalvit and Wojciech H. Zurek, T-QC; and Luiz Davidovich and Fabricio Toscano, Federal University, Rio de Janeiro, Brazil</i>	

Shock Waves in Ultracold Atomic Gases	259
<i>Bogdan Damski, T-QC</i>
